

## Hardin County Goes Green

### REUSE

Less waste is created when materials are **reused** and **recycled**, extending the life of existing landfills, and **reducing** the need for new ones.

### REDUCE

**Reducing** your waste saves money and generates revenue from recyclables.

Waste **reduction** helps conserve our valuable natural resources, **reduces** pollution and saves energy.

### RECYCLE

**Recycling** prolongs the life of materials by reprocessing them into a new material or product rather than land filling them.
